Controll-A-Door® Prodigy™

Overhead Sectional Door Opener

When your home is your castle, Prodigy delivers smooth, ultra quiet operation, stylish design and the option of controlling via your smart phone.

- Heavy duty 1000N Motor
- Ultra quiet belt drive
- Soft start and stop to reduce door stress
- Long lasting automatic LED courtesy lights

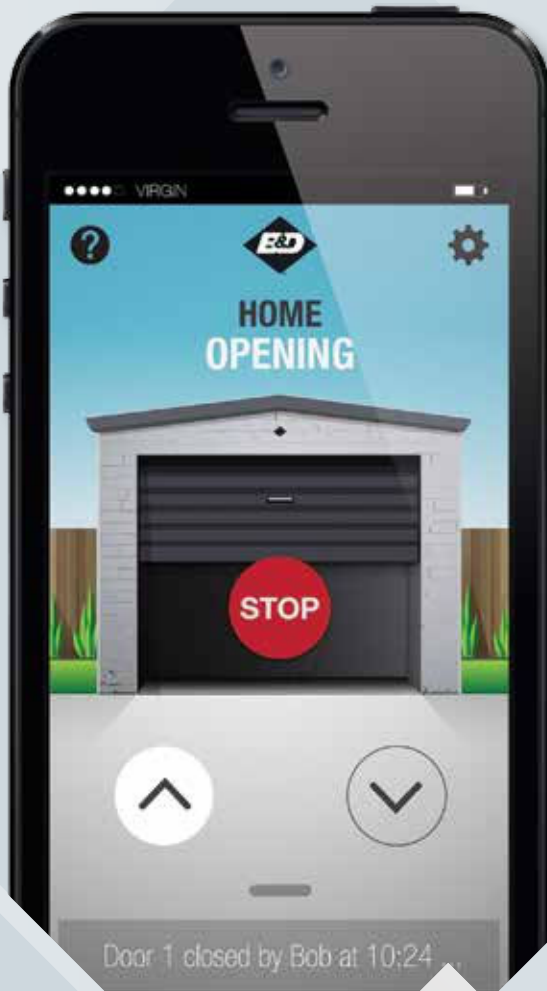

5 year warranty applies to Prodigy Opener only.
Smart Phone Control Kit carries a 12 month warranty.

Smart Phone Control Kit

The Controll-A-Door® App turns your phone into an additional remote control, able to easily monitor and control your garage door from anywhere in the house, at work, or anywhere in the world!*

It's the perfect solution for those of us who carry our smart phone with us all the time.

*If you've ever left home and asked yourself,
"Did I forget to close the garage door?"
– problem solved!*

What's Included in the kit

1. Touchscreen Basestation and accessories
2. Access Code for downloading the Controll-A-Door App

Touchscreen Basestation

In addition to the App, the kit includes a touchscreen basestation and transceiver that connects wirelessly to your home's Wi-Fi router.

Peace of Mind

The built in Activity log displays usage history so you can see who has operated your garage door and when.

Real Time Alerts

Push Notifications can be set up to alert you when there is an obstruction, a need to service your opener or other relevant events.

Gate Control

Extended range technology used in the kit allows you to also operate compatible entrance gates using the App.

System Requirements

Home Wi-Fi Router

Installation to be carried out by a B&D approved dealer or installer

B&D strongly recommend the use of Safety Beams with the Smart Phone Control Kit. See over for details on our Safety Beams.

* Subject to cellular and WiFi connection and availability.

The Importance of Safety Beams

B&D always recommend the use of safety infra-red beams on all automatic garage doors. As the Smart Phone Control Kit allows for true remote control of your garage door while you are away from home, it is important to consider safety beams to avoid the risk of damage or injury.

If the beam is broken while the door is closing it will automatically stop and reverse.
